Chance to Win Prizes

***Did You Know?** African-American children drown at a rate almost three times the overall rate. Nearly 60 percent of African-American children cannot swim, almost twice the figure for white children, according to a first-of-its-kind survey which USA Swimming has conducted with the University of Memphis.*

*Through this effort we hope to increase awareness and lower minority drowning rates in the community. Come to this **FREE Event** to find out what you can do to decrease the drowning rate in your community and save lives*
