

AGE REPORT

Preliminary JO numbers through our December meets were compiled by Jim Thompson and Tim Husson. At this stage the meet should be a comfortable size. There are 5941 qualified splashes, of which 1486 are excess cuts. This brings us to about 4450 splashes. In looking at last year we picked up a few hundred new cuts in January and February. Keep in mind those new cuts will not necessarily all be entered. They may be cuts in addition to others already made and / or may be substituted for other events. There are 1163 athletes qualified through the end of December.

A request has been sent to Jim Thompson to try and update our JO forecast through last weekend but he is busy with Virginia HS meets and may not have time.

Judging by what we currently have qualified, my guess is JO's should top out somewhere around 1250 athletes and about 4800 splashes.

The January Open was moved to MD given the situation at Fairland. The meet ran very well in both courses. There was more than ample space for athletes and coaches on deck. Many Thanks to Carrie and her staff for being quick to rectify any equipment issues that arose. While cost is a major factor at this facility, we might want to consider MD for future open meets.
